- **Backend:** PHP, Laravel, MySQL, REST APIs, Backend Development
- **Frontend:** HTML, CSS, JavaScript, jQuery, Bootstrap, ReactJS
- **WordPress:** Theme and Plugin Customization, Elementor, Avada, Astra, Spectra, WPML, Polylang, WP Rocket
- **Testing and Performance:** Automated Testing (Playwright), Debugging, Google PageSpeed Insights, WebP Image Optimization
- **Deployment and Version Control:** Git, GitHub, AWS, AWS CloudWatch, PuTTY (SSH), FileZilla, Staging and Production Environments
- **Workflow and Tools:** Agile (Daily Stand-ups), Figma, Active Collab, Trello, GitHub Copilot, Basic SEO
- **Languages:** English (Proficient), Malay (Fluent)

PROFESSIONAL EXPERIENCE

Web Developer | 2Stallions
October 2024 – October 2026

- Delivered **10+ client websites** for retail businesses (LED displays, boat engines, gold jewellery, air purifiers) by converting **Figma** designs into **WordPress** sites built with **Avada, Astra, Spectra, and Elementor**.
- Improved **Google PageSpeed** scores from **60 to 98 on desktop** and **40 to 70+ on mobile** across multiple new client sites by converting images to **WebP**, removing unused plugins, and configuring **WP Rocket** caching.
- Built **multilingual websites** in up to **3 languages (English, Malay, Chinese)** using **WPML** and **Polylang**.
- Developed backend features with **PHP and MySQL**, including **custom plugin modifications** and basic **SEO** setup.
- Automated website **QA testing** with **Playwright** and **GitHub Copilot agent mode**, generating audit reports with the page, issue, fix recommendation, and screenshot for each broken image, button, or link.
- Implemented designer-supplied **CodePen animations** across multiple WordPress themes and page builders using **JavaScript and CSS**.
- Gathered requirements in regular **client meetings** with the content team and tracked tasks and timelines in **Active Collab**.

Junior Web Developer | Wikicareer
October 2023 – October 2024

- Built responsive frontend features using **HTML, CSS, JavaScript, Bootstrap, and jQuery**.
- Developed backend logic with **PHP, Laravel, and MySQL**, including **API integrations** for job listings.
- Monitored **AWS CloudWatch** metrics to pace API calls and prevent traffic spikes from overloading the site.
- Tested changes on a **staging site** before production release, deploying with **FileZilla** and **PuTTY (SSH)** and tracking tasks in **Trello**.

EDUCATION

Diploma in Electronic and Electrical | Micro Tech TVET College
September 2019 – October 2023

CERTIFICATIONS

- Web Development on FreeCodeCamp
- AI Prompt Engineering, AI Agents, and Vibe Coding on Coursera
